Studi menyimpulkan bahwa kata-kata slang sekunder adalah satu-satunya jenis yang ditemukan dalam lirik lagu Green Day

Kata kunci: bahasa gaul, jenis, dan lirik

Introduction

Slang word is one of the linguistic aspects in language uses. The language variety is non-standard and seasonal. Slang language is often used as a part of social identity and has a different meaning which usually makes everyone who first time hears the word will be confused but interested in using it. To English learners, using English slangs can make them sound more updated and casual in informal conversations.

Some common English slang words are often used in song lyrics too. For example the word *gonna* which is *going to* and the word *talkin'* which is *talking*. The use is to make some characteristic of the song as well as to represent feeling. It can make the song sound more interesting. For example in the song of Travis Scott on Astroworld album in entitled "*Stop Trying to be a God*" there is the word "*tryna*", this the slang word of "*try to*".

This study is an analysis types of the slang words found in five album of Green Day song lyric, namely “1,039 Smoothed Out Slappy Hours” (1990), “Kerplunk !”(1991), “Dookie” (1994), “Father Of All..” (2020), and the last album “American Idiot” (2004). Green day is an American punk rock band that formed from 1987. Green day have seventeen. This study analyzed 5 albums of Green Day and every song in the album. According to Salim (1983) slang words are unique words. Usually only members of a group of people understand their meanings. Originally slang words are created only to be used for secret communication so that ordinary people will not understand what the words mean. The aim of this study is to help English learners understand the meaning of English slang words used in some English popular songs because in the song lyrics a lot of slang words are used and lot of learners of English like listening to English music.

The significance of this study is to help students who learn English understand about English slang words found in the songs so that they know the meanings of the words. The study is expected to give contribution towards the theory of language uses and language varieties and to become a literature to review, for those who want to do a similar research in the future. The method being used in this study is descriptive qualitative method and the data were analyzed based on the theory of Kipfer and Chapman (2007). The technique being used is observation technique. In this study the data collection was in some steps. The first was listening the song, the second reading and comprehending the lyric, the third, identifying the slang words found in the lyrics, and the last, marking the slang words.

Some of previous studies about slang word have been reviewed. The first study is thesis and written by Aprilia Lestary (2016) entitled “A Study of Slang Word in Song Lyric Used by Bruno Mars”. The study has two problems of the study such as to analyze the type of slang word used Bruno Mars’s in lyric, and to identity the dominant slang word found in Bruno Mars’s in lyric. The written on this study purposed the theory bay George Yule (1986) to analyze the types of slang and to identity the dominant slang word found in lyric of Bruno Mars based on some types of George Yule theory. Observation method was used to collect the data in that research and she design of this study was descriptive qualitative. The data were collected in Bruno Mars’s lyric. The similarity his study with this study were from the data source and from the problem of the study. The difference between his studies and this study were the theory we used for analyze the types of slang. In his study used the theory of George Yule (1986) to analyze the type, meanwhile in this study used the theory from Kipfer and Chapman (2007) to analyze the types.

The second is a journal article written by Shasha Ambhasari (2018) entitled “Translation of Slang Word Found in The Subtitle of Despicable Me Movie Into Indonesian”. The problems of this study were finding out the slangs, types of slang and discussing its equivalence in the translation of Despicable Me movie’s title. She used the theory found in Elsa Matiello (2008) to analyze the types and the theory found in Nida and Taber (1961) when applied theory of equivalence (formal and dynamic equivalence). In the study documentation method was used in collecting the data. The

difference from this study is in the data source: the previous study used a movie and this study used song lyric.

Method

The data in this study were taken from the Green Day song lyric in five albums. The album are “1,039 Smoothed Out Slappy Hours” (1990), “Kerplunk !”(1991), “Dookie” (1994), “Father Of All..” (2020), and the last album “American Idiot” (2004). Those songs were chosen because there are slang words found in the lyrics. The data collection was done in some steps: listening to the songs, reading and comprehending the lyrics, identifying the slang words found in the lyrics and marking the slang words. The writer used descriptive qualitative method to analyze the data, After collecting the data, the writer analyzed them through the following steps: tabulating the slang words that have been found, dividing the types and characteristic of the words, interpreting the meanings, and drawing conclusion. Formal and informal methods were used in presenting the findings.

Result and Discussion

Result

This sub chapter shows that the song lyrics on the five albums of Green Day contain slang words. That only a type of slang word proposed by Kipfer and Chapman (2007) was found in the five album of Green Day. The study found 21 slang words but there is no slang word that is classified into primary slang. All are secondary slang words.

Discussion

Primary slang

Primary slang is the slang word that is not used by many people in their social interaction. Primary slang words are usually chosen to express one as member of street gang, criminal, and hence to express someone’s contempt and superiority.

There is no slang word in the data source in this study that is included as the type of primary slang. In song lyrics only slang words that are common in daily communication in informal situation are usually found.

Secondary slang

Secondary slang can be defined as general non-standard words that are used in daily communication. Secondary slang is not considered as the speech of subculture members because it is common to many people. Teenagers usually use this type of slang in their daily conversation

Data 1
